Barangay Blotter Matrix

Standard Barangay Blotter Intake, Assessment, & Referral Protocol | Philippine Local Governance Context

NOTE: This matrix serves as an operational intake and triage framework for Desk Officers to categorize, monitor, and process general non-VAWC community blotter reports. Operational levels reflect reported factual circumstances and potential community risk; they do not establish legal guilt or replace statutory judicial proceedings. Immediate threats to life, active violence, or severe criminal offenses must be referred to emergency response and the PNP immediately regardless of category.

Level	Risk Classification	Examples / Indicators	Possible Escalation	Suggested Action
1	LOW — Minor Community Disturbance	Curfew noise violations; minor boundary disagreements; isolated pet nuisances; non-threatening verbal misunderstandings; minor sanitation issues.	Unresolved neighbor irritation; recurring complaints; gradual breakdown of community relations.	Log entry in main blotter; verify reported circumstances; provide friendly counseling or verbal advisory; dispatch Tanod for inspection if needed.
2	MODERATE — Recurring Dispute or Financial Conflict	Unpaid small monetary debts; property line disputes; minor accidental property damage; repeated nuisance behavior; tenant-landlord conflicts.	Repeated confrontations; financial disagreement; verbal harassment; risk of escalation into threats.	Document previous blotter entries; gather initial party statements; initiate formal Katarungang Pambarangay (KP) mediation process.
3	HIGH — Serious Non-Domestic Dispute	Credible verbal threats; persistent intimidation or slander; escalating confrontation in public; minor physical altercations without severe injury.	Physical injuries; retaliatory actions; substantial property loss; immediate threats to personal safety.	Promptly evaluate safety risks; record comprehensive sworn statements; consult Punong Barangay / Lupon; refer to PNP or medical services if unresolvable.
4	CRITICAL — Imminent Violent Threat or Crime	Serious physical assault; weapon-related threats; ongoing violent altercations in public spaces; theft or robbery; severe criminal violations.	Severe bodily harm; ongoing violence; harm to innocent bystanders; potential risk of fatality.	Activate emergency response; dispatch PNP immediately; protect community members; preserve crime scene evidence; do not attempt mediation during active violence.
5	EXTREME — Catastrophic / Armed Incident	Active armed attack; shooting or stabbing incidents; hostage situations; attempted homicides; events presenting immediate threat to life.	Multiple casualties; widespread public danger; loss of life; active ongoing safety threats.	Immediately contact PNP and emergency dispatch; execute evacuation protocols; prioritize life safety; assist law enforcement in securing the area.
